1.2.R1

1/1 point (graded)

Which of the following are supervised learning problems? More than one box can be checked.

- ☒ Predict whether a website user will click on an ad
- ☐ Find clusters of genes that interact with each other
- ☒ Classify a handwritten digit as 0-9 from labeled examples
- ☒ Find stocks that are likely to rise

Explanation

Problems with clearly defined "predictors" and "responses" are supervised.

1.2.R2

1/1 point (graded)

True or False: The only goal of any supervised learning study is to be able to predict the response very accurately.

☐ True

☒ False
